

ANIMAL MUSTER CARD - character code

		0	1	2	3	4	5
A	Assessment of the dog's expression, especially during the assessment	Lively, governable, without fear or aggression	Poorly governable, he will not stand in his attitude. Or an individual without temperament, extremely quiet, limited active response	Insecure, he dodges, he manifests fear from unknown environment or objects. He avoids measuring or teeth control	Mild fear, not aggressive.	Strong manifestations of fear. The dog is slightly aggressive to humans and dogs (for fear)	Aggressiveness towards humans or difficult to manage aggression towards dogs. Strong manifestations of fear
B	Temperament effort to work together	The dog shows a lively interest in the subject (toy) in the hands of the dog handler. After being thrown out, he runs out and delivers it to the dog handler, at the first try	The dog shows an interest in the subject, he runs joyfully and grabs the object, but he does not want to hand it over to the dog handler. More attempts to complete it are needed	The dog shows an interest in the discarded object, but after running close he loses interest in the subject. Dog handler calls the dog.	The dog shows an interest in the object after more provocation or he reaches the object and has no more interest, dog handler calls the dog.	The dog shows only a minimal interest in the object or the dog does not respond to the discarded object, must be repeated, dog handler calls the dog.	The dog shows only a minimal interest in the object either does not respond to the discard or the dog can not be called even after several attempts.
C	Impact sound (resistance of the nervous system)	Dog does not respond – he will most likely show a mild reaction	Active reaction – barking	The dog is mildly afraid (e.g. he lowers his ears, downcast tail)		The apparent hesitancy of the dog, the dog is afraid – he does not respond to the dog handler, he is trying to escape	The dog becomes aggressive from fear
D	Passage by a group of people	The dog is well-handled, he does not show aggression or fear	The dog is worse governable	Dog shows insecurity, to a slight fear	The dog rear up for fear, he does not want to join the group, but finally he passes the group without being aggressive to people	The dog becomes aggressive for fear of passing through the group towards the people in the group	The dog is unable to walk through the group and he is aggressive towards people
E	Passage by a group of people, one person in the group leads a dog	The dog is well-handled, he does not show aggression or fear	The dog is worse governable	Dog shows insecurity, to a slight fear of another dog	The dog exhibits mild aggression towards the dog, after the alert he calms down	The dog exhibits aggression towards the dog despite the warning of the dog handler	Dog is aggressive against dogs before entering the group

Implementing provisions + assessment of nature:

- A) Performed during the entire dog assessment process (assessment of the exterior, measurement, teeth control etc.)
- B) The owner has a dog for free and he shows the dog his own object (toy, ball ...). Subsequently, he discards the object min. at a distance of 5m (it is permissible to provoke the dog before throwing – encourage). After the object is dropped, it is possible to speak to the dog (this is not a recruitment exercise, but proving the bond and trying to cooperate between the dog and the owner)

- C) Response to impact sound is to prove the resistance of the nervous system and noise control, with which the dog can meet anywhere. For the examination enter suddenly max. 5 owners with their dogs, who stand back to the crashing sound in a natural attitude (the dog stands on left leg) on a ruffled leash.
- D) The group consists of at least 5 people. The owner has a dog on a leash and he comes naturally to the group in which he stops. Someone in the group will take their hand with the dog owner, another caress the dog. Subsequently, the owner leaves the group.
- E) The group consists of at least 5 people. The owner has a dog on a leash and walks natural walking through the group – one person in a group has a dog leaning on a leash.

Note to point D) and E)

= dogs do not have muzzle. If the dog owner wants that the dog has his muzzle, is this request accepted, but the dog can no longer receive by evaluating these disciplines a numerical score of 0.1 or 2.
